

BOGALUSA WEST SOLAR PROJECT

PROJECT UPDATE

Harnessing the Power of the Sun | August 2022

Bogalusa West PV 1, LLC is proposing a 200 MW solar energy facility in Washington Parish, bringing many positive impacts to the local economy and community.

The project is under development by Savion, a Shell Group portfolio company operating on a stand-alone basis with a growing portfolio of more than 19 GW, and is one of the largest, most technologically advanced utility-scale solar and energy storage project development companies in the U.S.

A solar project provides a healthy, productive economic development opportunity for local land to harvest a stable cash crop—the sun.

We are excited to be working in partnership with the Washington Parish community on an opportunity to host a clean, environmentally compatible, renewable energy generation facility.

1

Bogalusa West Solar Project, located north of Bogalusa, represents a potential capital investment of \$200 million in Washington Parish.

2

Over 30 years, the solar project will generate an estimated \$52 million in taxes paid to the local community.

3

The project will fund local services in Washington Parish, including schools, police, fire, and parish infrastructure without placing strain on these services.

*Amounts subject to change as project development advances
